EDUCATION

University of California, Los Angeles (UCLA)

Graduation: June 2026

Computer Science and Linguistics, Minor in Data Science

GPA: 3.7/4.0

- **Coursework:** Data Structures, Algorithms, Computer Systems, Machine Learning, Applied Numerical Computing, Natural Language Processing, Computational Linguistics, Business Foundations, Communications, Acting Fundamentals

St. Joseph's Institution, Singapore

Graduation: Jan 2022

- 18th in Singapore Math Olympiad; 33rd in National Olympiad in Informatics; Top 30 International in Euclid Math Contest

EXPERIENCE

PaperHouse: paperhouse.ai, Founder

Apr 2026 - Now

React Native, Expo, TypeScript, Next.js, Supabase, PostgreSQL, SQLite

Los Angeles, CA

- Founded & shipped PaperHouse, a digital notebook. Owned product, design, engineering, from concept to iOS/web launch.
- Built the product end-to-end across React Native and Next.js, including voice capture and playback, authentication, search, cloud storage, text editing, embedding indexing, and cross-device synchronization.
- Architected an offline-first data layer and durable AI pipeline for transcription and journal enhancement, with persistent job queues, idempotent processing, bounded retries, and recovery from network and authentication failures.

Uphealth AI, Product Manager

Feb 2025 - May 2025

Product Strategy, Product Design, Agile, Figma, Fine-Tuning

Los Angeles, CA

- Won \$10K second-place prize among 100+ teams at UCLA Innovation Challenge for developing AI mental-health product.
- Wrote most of the product strategy and PRD, led 0→1 user flows, prototyping, and launched website uphealth.ai

Accenture, Machine Learning Intern

Aug 2024 - Dec 2024

Python, PySpark, Transformers, spaCy, Keras, Neo4j, ETL, CI/CD

Los Angeles, CA

- Built an AI-powered intelligence system that processed 6,000+ tech news weekly, deliver market insights straight to clients.
- Engineered NLP and ETL pipelines using spaCy, Pandas, and PySpark for feature extraction and data transformation.

Alibaba Yungu, Software Engineer Intern

July 2023 - Sept 2023

React, JavaScript, Node.js, REST API, Java, SQL, Spring, Agile

Hangzhou, China

- Shipped a React interface used by 30+ schools and 10,000+ students on Alibaba's education platform.
- Built backend filtering APIs with Java and SQL, cutting search latency by 50% through query and indexing optimization.

PROJECTS

Website: haoji.wang | *Next.js, Tailwind, TypeScript, MDX, Vercel*

- Designed this website, demonstrating PaperHouse and my writings on here.

Content work for my friend Viraj Ala | *Content, Growth Strategy*

- Filmed 60+ founder/VC interviews for my friend Viraj Ala @viraj.ala, supporting growth from 5k followers to 100k+.

Mentor AI Coach - mentor.haoji.wang | *AI Agent, Langchain, RAG, Vector DB, Persona Engineering*

- AI mentor delivering 100+ interactions to help users apply mental models through emotionally intelligent dialogues.

World Happiness Predictor - [github link](#) | *Scikit-learn, Random Forest, Regression*

- ML model that uses indexes to predict world happiness scores, with 91% accuracy.

SKILLS

Languages: Chinese (native), English (native)

Python, TypeScript/JavaScript, SQL, Java, C++; LangChain, NLP, Transformers, PyTorch, TensorFlow, spaCy, Pandas, RAG;
React, React Native, Expo, Next.js, Tailwind; Node.js, Supabase, PostgreSQL, SQLite, MongoDB, PySpark, Docker
